### METHODS:

CHEMEX	8oz	12oz	16oz	20oz	32oz
	-	-	\$3.25	3.75	4.95

Infusion of coffee with a thick paper filter gives a full body & highlights the "brighter" notes. An iconic brewer with a timeless design invented in 1941, the Chemex brews a clean cup and maintains body and balanced floral notes.

KALITA WAVE	8oz	12oz	16oz	-	-
	\$2.75	2.90	\$3.25		

Its flat, three-holed bottom restricts the flow of water that produces a slightly more concentrated cup of coffee than other drippers. The ridged filters hold the slurry out away from the dripper's walls, allowing air to (1) balance the flow of water and (2) act as an insulator, keeping your brew warm.

HARIO V60	8oz	12oz	16oz	-	-
	\$2.75	2.90	\$3.25		

With its spiral ridges & a light filter, the V60 works well with bright, fruity, & floral coffees. The V60 also has a set of raised grooves spiraling down the inside of the cone. The purpose of these grooves is to hold the bed of grounds away from the walls of the V60. This allows for airflow along the sides, which aides in even water flow along the edges, leading to a more balanced extraction. An important factor in pour over brewing is even extraction. You want the water to flow through all of your grounds at once and at a constant pace. If water sits too long around the edges you can get a little over-extracted bitterness going on.

FRENCH PRESS	8oz	12oz	16oz	20oz	32oz
	-	-	\$3.25	3.75	4.95

A full-bodied cup using a metal filter permits oils to pass. French press doesn't soak up flavor & adds tiny bits of coffee grounds in the coffee that percolates flavor. Darker roasts typically taste better this way.
