SLOW BREW

FRENCH PRESS

<u>16 OZ</u>	<u>32 OZ</u>
3.95	7.25

A full-bodied cup using a metal filter permits oils to pass. French press doesn't soak up flavor & adds tiny bits of coffee grounds in the coffee that percolates flavor. Darker roasts typically taste better this way.

CHEMEX

4.50	7.95
------	------

Infusion of coffee with a thick paper filter gives a full body & highlights the "brighter" notes. An iconic brewer with a timeless design invented in 1941, the Chemex brews a clean cup and maintains body and balanced floral notes.

HARIO V60

<u>8 OZ</u>	<u>12 OZ</u>	<u>16 OZ</u>
3.75	3.95	4.25

With its spiral ridges & a light filter, the V60 works well with bright, fruity, & floral coffees. The V60 also has a set of raised grooves spiraling down the inside of the cone to hold the bed of grounds away from the V60 walls. This allows for airflow along the sides, which aides in even water flow along the edges, leading to a more balanced extraction.

KALITA WAVE

3.95	4.25	4.50
------	------	------

Its flat, three-holed bottom restricts the flow of water that produces a slightly more concentrated cup of coffee than other drippers. The ridged filters hold the slurry out away from the dripper's walls, allowing air to (1) balance the flow of water and (2) act as an insulator, keeping your brew warm.

Slow brews are just that...slow, as they are poured by hand! Expect 15-20 minutes from time of ordering for your slow brew to arrive.
